

Ashhad Ali M P

ashxdali786@gmail.com | +91 8891960896 | linkedin.com/in/ashhad-ali786 | github.com/ashxdali

PROFESSIONAL SUMMARY

Computer Science and Design Engineering graduate with hands-on experience in cloud computing, networking, and infrastructure management. Skilled in AWS, multi-cloud storage solutions and network troubleshooting. Experienced in VoIP systems, server migration, and cloud cost optimization, with strong abilities in client coordination and delivering reliable, scalable solutions.

ACADEMIC CREDENTIALS

- | | |
|--|---------------------------|
| • Federal Institute of Science and Technology (FISAT)
<i>B.Tech in Computer Science and Design Engineering</i> | Ernakulam, Kerala
2025 |
| • Rahmania HSS
<i>HSE – 90.75%</i> | Kozhikode, Kerala
2021 |
| • Devagiri CMI Public School
<i>AISSE – 83.4%</i> | Kozhikode, Kerala
2019 |

TECHNICAL SKILLS

- **Programming Languages:** Python, C, SQL, Java
- **Web & App Development:** HTML, CSS, JavaScript, React.js
- **Tools & Software:** Power BI, LaTeX, Blender, Unity, Git, VS Code, Git Lab
- **Cloud Platform:** AWS, Azure, GCP
- **Storage:** Amazon S3, Azure Blob Storage, Google Cloud Storage
- **Networking:** IPv4, IPv6, Network Switch Configuration, TCP/IP, Firewalls, VPN, NAT
- **OS:** Windows, Linux

WORK EXPERIENCE

- | | |
|---|---|
| • RGB Broadcasting Pvt Ltd
<i>Project Engineer</i> | Ernakulam, India
June 2025 – Present |
| <ul style="list-style-type: none">– Managing and maintaining cloud infrastructure using AWS services including EC2, Cloudwatch and S3.– Designed and implemented multi-cloud storage solutions using AWS S3, Azure Blob Storage, and Google Cloud Storage to ensure high availability and redundancy.– Performed cloud cost optimization by analyzing storage tiers, retrieval patterns, and egress costs.– Created and maintained cloud architecture diagrams and technical documentation for system workflows.– Configuring and troubleshooting IP-based communication systems including VoIP and SIP devices.– Handling network configurations involving NAT, firewall rules, and IP addressing to ensure seamless connectivity.– Diagnosed and resolved real-world network problems such as IP conflicts, subnet misconfigurations, and routing issues. | |

- Performed switch configuration and network setup for stable and secure communication.
- Executed server installation and migration tasks, ensuring minimal downtime and secure data transfer
- Coordinated with clients through professional email communication, providing project updates and resolving technical queries
- Managed project workflows, tracked progress, and ensured timely delivery of tasks
- Assisted in requirement gathering and technical documentation for project execution
- Configuring and maintaining network infrastructure, including switch configuration, IP addressing, NAT, firewall rules, and troubleshooting connectivity issues.
- Installing, configuring, and migrating servers in Linux-based environments, ensuring minimal downtime and secure data transfer.
- Handling VoIP and IP telephony systems, including configuration and troubleshooting of SIP-based devices such as Yealink IP phones.
- Coordinating with clients for project updates, requirements gathering, and issue resolution through professional communication and email handling.
- Managing project workflows, tracking progress, and ensuring timely delivery of cloud and infrastructure-related tasks.
- Preparing technical documentation, system architecture diagrams, and deployment reports to support project execution and maintenance.

CERTIFICATIONS & VALUE-ADDED COURSES

- NETGEAR AV Level 1
- Innovating with Google Cloud AI - Google Cloud
- Web Application Development using React.js
- Foundation in Cybersecurity – Google
- iOS App Development using Swift
- Training Workshop on Power Communication by Vertical Eye

INTERNSHIP EXPERIENCE

- **iPlanet Education** 2022
Intern – iOS Development
 - Acquired programming skills in Swift and gained an understanding of iOS app development.
 - Developed user interfaces for multiple sample applications.
- **Keltron Knowledge Centre** 2023
Intern – Machine Learning & AI
 - Gained practical knowledge of machine learning algorithms and artificial intelligence systems.

PROJECTS

- **Multi Cloud Storage System** 2026
AWS, Azure, GCP *In progress*
 - Designing and implementing a multi-cloud storage solution integrating AWS S3, Azure Blob Storage, and Google Cloud Storage for data redundancy and high availability.
 - Working on cloud environment configuration, access control, and secure data transfer across multiple cloud platforms.

- Analyzing storage usage, retrieval patterns, and egress costs to optimize cost efficiency across providers.

- **PCB Anomaly Detection Using Machine Learning** 2024

YOLOv5, Python

- Developed a YOLOv5-based model achieving 94.8% accuracy in detecting PCB anomalies.
- Preprocessed 1,386 images, resized, annotated, and trained the model for 75 epochs.

- **Mental Health Virtual Assistant Chatbot** 2024

Python, TensorFlow, SQLite

- Built an AI-driven chatbot that provides emotional support and mental health guidance.
- Implemented NLP-based emotion detection for identifying mental health issues like depression.
- Ensured user data privacy and scalability through secure SQLite storage.

VOLUNTEERING EXPERIENCE

- Volunteered in multiple inter-college events.
- Organized and managed the Industrial Visit for our department.

PERSONAL TRAITS

- Industrious
- Problem-Solving
- Collaborative
- Adaptable

CO-CURRICULAR & EXTRACURRICULAR ACTIVITIES

- Workshop on Web Application Development using React.js – Logix Space Technologies (2023)
- Attended Workshop on Self-Driving Electric Vehicles – IIT Kharagpur (2023)
- Internship on Road Safety Awareness – Association of Civil Engineers (2022)

HOBBIES & INTERESTS

- Fitness
- Photography
- Hodophile
